OPTION 1 AMBULANCE TRANSPORTATION NOT NECESSARY

In my professional opinion, this patient does not require transport by ambulance and can be safely transported by other means. The patient's condition is such that transportation by ambulance is not required because the means listed below are safe and acceptable:

Patient can safely support him/herself while in a wheelchair and does not require monitoring by trained personnel.
 Patient is able to tolerate transportation by automobile or wheelchair van.

OPTION 2 AMBULANCE TRANSPORTATION NECESSARY

In my professional medical opinion, this patient requires transportation by ambulance should not be transported by any other means. The patient's condition is such that the use of any other method of transport would be contraindicated.
 The CMS definition of Bed Confinement is: the inability to get up from bed without assistance; unable to ambulate; and unable to sit in a chair or wheelchair at the Time of Service. (ALL MUST BE MET)

Is your patient bed-confined as defined by Medicare (CMS) Regulation? YES NO

If the patient does not meet the criteria for bed-confined, can the patient be safely transported by wheelchair van? YES NO If NO, please check the appropriate medical condition(s) listed below which would necessitate transport by ambulance and make all other means of transportation contraindicated based on patient safety and health.

This patient: **** (A) – MUST BE DEFINED IN OTHER ****

<input type="checkbox"/> Requires continuous oxygen monitoring by trained staff. <small>NOTE: Patients who are generally mobile with portable oxygen would not require ambulance transport based solely on the need for oxygen.</small>	<input type="checkbox"/> Has to remain immobile because of a fracture/possibility of fracture which has not been set.
<input type="checkbox"/> Requires airway monitoring and/or suctioning.	<input type="checkbox"/> Is ventilator dependent.
<input type="checkbox"/> Requires restraints or sedation.	<input type="checkbox"/> Has contractures. (A)
<input type="checkbox"/> Is comatose and requires trained monitoring.	<input type="checkbox"/> Has decubitus ulcers & requires wound precautions. (A)
<input type="checkbox"/> Is on hip precautions and cannot sit safely. (A)	<input type="checkbox"/> Requires cardiac monitoring
	<input type="checkbox"/> Is exhibiting signs of a decreased level of consciousness. (A)

OTHER** pertinent information relating to medical necessity of ambulance transport: _____

OPTION 3 FOR HOSPITAL TO HOSPITAL TRANSFERS ONLY

Is the patient being transferred to a higher level of care? YES NO

If YES, the following items must be completed:
